

The AG Gazette

Models, machines, and matters of consequence

PARIS, THURSDAY 15 OCTOBER 2026 AFTERNOON EDITION · No. 2026-10-15-AFTERNOON ISSUED 16:09 CEST PRICE: COMPLIMENTARY

AFTERNOON EDITION — THURSDAY 15 OCTOBER 2026

Reporting window: 15 Oct 2026, 06:10 CEST to 15 Oct 2026, 16:09 CEST (Paris time). Issued 15 Oct 2026, 16:09 CEST.

No material verified developments since the morning edition, issued at 06:10 CEST on October 15. We checked fresh leads across models, coding and agents, research, and industry and policy, but none cleared both the original-date and substantive-verification gates for this interval. Rather than replay unchanged headlines or fill the paper with older background, this edition records the result and the coverage limits. It does not establish that no developments occurred outside the sources we could verify.

0 NEW OR UPDATED DISPATCHES · 0 BACKGROUND ITEMS · PREVIOUS: [2026-10-15-MORNING](#)

THE NEWS

No verified news in this window. This edition prints no new or updated dispatches rather than pad the page with unverified items.

DEVTO: ok
x: skipped-unconfigured

COVERAGE NOTES

- No material new development could be verified after the previous actual edition at 06:10 CEST on October 15. This is a bounded editorial finding, not a claim that the wider AI news cycle was quiet.
- Models, coding and agents, research, industry, infrastructure and policy were searched across a two-day discovery window. Older announcements and unchanged morning stories are not repeated; there is no background filler.
- The engine returned 80 evidence items across five sources. These are leads and community discussions, not 80 verified news stories.
- Polymarket was unreachable because TLS hostname verification failed. No odds are reported and TLS verification was not bypassed. X was not configured.
- YouTube returned two videos but neither transcript was available because subtitle requests were rate-limited. The engine overall source state remains ok; it does not mean transcript coverage was complete.
- Reddit returned evidence but one listing sub-request failed with HTTP 422. The original per-source state is preserved as ok, with this partial-lane limitation.
- Three post-engine web supplements were run. The configured search backend was unavailable and the host used its automatic keyless fallback. Primary-source checks rejected later digest dates as evidence of a new launch.
- A same-day model-release lead could not be verified directly because its official announcement and product pages returned HTTP 403, so it was withheld rather than reported as confirmed.

ENGINE FOOTER

All agents reported back!
└─ Reddit: 20 threads | 896 upvotes | 491 comments
└─ YouTube: 2 videos | 299,980 views | 0/2 with transcripts
└─ HN: 32 stories | 2,854 points | 2,125 comments
└─ dev.to: 13 articles | 176 reactions | 86 comments
└─ GitHub: 13 items | 25 reactions | 101 comments
└─ Top voices: r/artificial, r/LocalLLaMA, r/singularity

- No newly verified research or policy development met the cutoff. Pre-cutoff papers, releases and reports were not reclassified as fresh based on later discussions.
- No browser cookies, new optional services, credentials, paid enrichment, TLS bypass or schedule changes were used. Raw research and provenance stay private.

The AI Gazette is a locally rendered digest. Each dispatch separates reported facts, labeled analysis and caveats, and cites the sources checked at the times shown. Background items are older or undated context, not new reporting.

Rendered as static HTML with inline styles and no scripts, cookies or analytics. Typefaces are requested from Google Fonts (fonts.googleapis.com, fonts.gstatic.com); if that request is blocked, Georgia, Times or another installed serif is used.
